

Internet

Fast, reliable, scalable Internet for your business.

- Scalable speeds ranging from 100 Mbit/s to 100 Gbit/s across Europe
- 10 Gbit/s speed available in 360+ data centres
- 100 Gbit/s speed available in 155+ data centres
- Available in 2,200+ Enterprise buildings
- Delivery in as little as 14 days, and always under 30

From productivity and collaboration tools to mission-critical applications.

A new way for Cambridge businesses and research institutions to connect to key sites and communities across Europe is now available thanks to **Light Blue Fibre** and bandwidth infrastructure provider **euNetworks**, working in collaboration.

Light Blue Fibre chose to partner with **euNetworks** as a critical bandwidth infrastructure company and the Backbone of Europe's Digital Future.

Geographical Route Diversity

1

With unmatched data centre footprint, dense metro coverage and diverse long-haul backbone, you gain unrivalled route flexibility and choice.

Recognised ASN Number

2

With AS 13237, you benefit from diverse, multiple upstreams and extensive peering, delivering fewer hops, optimised routes and latency.

Exceptional Service Quality

3

euNetworks own and operate a private duct and fibre network. With complete control, they provide unmatched stability, security, and service quality.

A Highly Connected Solution

As a Tier 2 Internet Service Provider (ISP), euNetworks AS 13237 combines direct European-based peering relationships and Upstream transit from multiple leading Tier 1 ISPs to ensure a redundant, reliable, and high-performance Internet connection for your business.

Access immediate pricing and manage your service through the Connected Customer Portal.
